I just purchased a new Chevy Avalanche equipped with the XM Satellite Radio, and I love it! I am so sick of regular radio with redundant programming and excessive commercials, I just don't listen much to regular radio anymore. There are so very few independant quality stations around (WKLU and KRXS are two that I listen to when I get a chance). I hope the FCC will not impose restrictions on the XM radio because of pressure from the conglomerate monopolies like clear channel that control what we hear and when we hear it. I don't appreciate hearing vulger language on radio and I don't support that. I do however want to hear unsigned bands and great talent that I have heard on XM that regular radio won't play. I feel the XM RSatellite Radio is our future! Please don't ruin it. I am a voting American citizen that is trying to help the economy get going again . I buy American whenever possible because I believe it is time we support ourselves and what is important to us ( I have purchased a new Chevy Truck and new Harley Davidson this year). I am educated and active. Please feel free to contact me with questions or further comments , or would like me to help support XM Radio. Thanks Scott Stemen (317)627-0450
